

**SCOPE OF APPLICATION | APPLICATION**  
F&B portfolio 3-pole | Cable quality S3930

**PCN26\_001**

## CURRENT DESIGN

## NEW DESIGN

## MODIFICATION

As part of our ongoing product optimization and our commitment to sustainable solutions, we are adapting the design of the cable used.

Previously, a 4-wire cable was used to manufacture the 3-pole version, with the excess wire being cut off. In future, we will switch to the direct use of a 3-wire cable.

### Advantages

- Simplified processing
- Reduced material usage
- Avoidance of unnecessary waste
- Active contribution to environmentally conscious product design

## CONFIRMATION OF WARRANTED CHARACTERISTICS

- The guaranteed electrical and mechanical properties remain unaffected by this change.

## DATE OF MODIFICATION

- The changes will be implemented from mid-January 2026..
- There may be isolated cases of mixed deliveries, as the item numbers will remain the same and existing stock will be sold off after the changeover.

## AFFECTED ITEM
